Harun Anne

Staff Software Engineer at Visa Inc
Austin, Texas, United States

Summary

A software engineer specializing in full-stack web development using MongoDB, Express.js, ReactJS, and Node.js (MERN) stack. An avid code warrior that seeks to become the highest level possible. With a keen interest in Data Structures and Algorithms and constantly seeking a deeper understanding of their uses and impact in the world around us.

Summary of the skill set:

Programming languages: Java, Python.
Web Technologies: JavaScript, HTML5, CSS3, Bootstrap, Restful Services, WordPress.
Frameworks: Angular 7, Node.js, ExpressJS.
Testing Frameworks/Tools: REST Assured, Cypress, TestNG, Selenium, Cucumber, Apache JMeter, Junit
Database Technologies: MySQL, PostgreSQL, JSON, Cassandra, MongoDB.
Development Tools: GIT, Jenkins, JIRA, IntelliJ, npm, Apache Tomcat 8.0, Cogent, Disciple.

Experience

Visa

5 years 9 months

Staff Software Engineer

August 2024 - Present (2 years)
Austin, TX

Staff Software Development Engineer in Test

April 2023 - August 2024 (1 year 5 months)
Austin, TX

- As a Staff software test Engineer, I will play a pivotal role in our Merchant & Acquiring Processing and Visa Risk departments.
- Lead QA team responsible for Web and API testing focusing on delivering high quality products.

- Led the testing and integration of various machine learning models in last 2 years which generated fraud scores for real-time transactions, enabling clearing houses and banks of different countries to prevent Fraudulent activities.
- Invented and patented automation of release management process, streamlining software development and reducing human intervention resulting in reducing the release time by 40% and error rate by 10%.
- Built and lead excellent test engineering teams with varied experience in automation, integration, performance and functional testing.
- Created Performance results analyzing tool using GenAI which generates insights to improve latency after each run.
- Emulated strong leadership and management capabilities with the capacity to engage, motivate, train, mentor test engineers.
- Developed Automated Security testing framework as part of Shift Left initiative and integrated it to Jenkins for CI/CD pipeline.
- In this mission-critical role, it's an opportunity to design and implement test solutions and taking it to production with high quality completing all testing phases, following an agile methodology.
- Leading cross functional teams in defining solid test plans, generating reports and gathering requirements. Facilitate communication across departments, clarify requirements and guide architectural decisions.
- Java, Python, GO, MySQL, Selenium, Cypress, Cassandra, Jenkins, JMeter, Gatling, Rest Assured, JavaScript, Apache Kafka

Sr. Software Development Engineer in Test
November 2020 - April 2023 (2 years 6 months)
Austin, Texas, United States

FINRA

Software Development Engineer In Test
July 2019 - January 2021 (1 year 7 months)
Rockville, Maryland Area

- Worked on BEAST (Behaviour Analytics), CDIP and CATDD projects.
- Create, review, execute and maintain Test Plans & Test Cases for new features and provide TSR for releases of Web Applications.
- Identifying bugs by Functional, Regression, Security testing, etc and evaluating the severity for the current CI/CD Pipeline.
- Work with cross-functional teams to identify and develop test cases for functional and performance testing. Active participation in the continuous improvement of the automation strategy and framework.
- Implemented Page Object Model by using Page Factory elements.

- Implemented automation using Selenium Web Driver, Java, Selenium Grid, Cucumber, TestNG and Maven.
 - Create required Selenium support code in Java for Cucumber.
 - Execute parallel browser testing on machines using Selenium Grid.
 - Create shell scripts on Linux server to automate execution of test framework.
- Review Error log files in UNIX box when order fails to load into SQL tables.
- Java, MySQL, PostgreSQL, REST Assured, TestNG, Selenium, Cucumber, Jenkins, Apache JMeter, Maven.

George Mason University

Graduate Teaching Assistant, Applied Information Technology
Department

May 2018 - June 2019 (1 year 2 months)

United States

- Organizing and running Java and Python lab sessions for undergraduate students.
- Identifying issues in student's assignments and guiding them in their areas of improvement.
- Assist with classroom instruction and running the Q&A sessions for the students.
- Grading the assignments and lab submissions to provide feedback.

ADP

Full Stack Developer

August 2016 - July 2017 (1 year)

Hyderabad Area, India

- Worked on a project named IPM, which processes HR services to the existing clients of ADP for a trial period.
- Developed an entire chat functionality which includes creating web pages to capture the client's requirements and perform validations using ReactJS and Node.js.
- Reduced page load time to less than 2 seconds for 10+ websites, obtained search engine rankings and boosted the conversion rate by up to 37%.
- Performed manual testing for various test cases during the developmental phase of the product.
- Participated in the daily huddles and weekly team meetings.
- ReactJS, Node.js, MongoDB, HTML 5, CSS 3, JavaScript, RESTful APIs, MVC, Webpack, Mocha, Visual Studio.

Naaniz

Software Developer

March 2016 - August 2016 (6 months)

Indore Area, India

- Created an e-commerce website for Naaniz with ReactJS and Java.
- Developed features and refined code, producing smoother operations and enhancing user engagement.
- Delivered engaging user experience through optimization of images, code, and cross-browser compatibility and thereby increasing Time on Page by 60+ seconds.
- Managed the Git repositories and reviewed the code.
- Java, ReactJS, HTML 5, CSS 3, JavaScript, Bootstrap, WordPress (Creta), Apache Tomcat 7.0, Visual Studio.

Education

George Mason University

Master of Science - MS, Computer Science · (2017 - 2019)

Mahatma Gandhi Institute of Technology

Bachelor of Technology (B.Tech.), Computer Science · (2013 - 2017)
